

2023-11-03 Large Language Models & chatGPT

David Haselbach & Lorenz Grundmann (Haselbach lab)

[20231103_HDYDI_chatGPT&LLM.mov](#)

Agenda:

1. Theoretical Introduction to Large Language Models (LLM) Presented by David Haselbach
David will provide an insightful introduction to the underlying architecture and mechanics of Large Language Models like chatGPT. Gain a deeper understanding of the power and limitations of these models, the training processes involved, and how they have come to play a pivotal role in modern AI applications.
2. Bash Scripting, Programming, and Fun with chatGPT Hosted by Lorenz Grundmann
 - Bash Scripting & Programming with chatGPT: Explore the intriguing possibilities of integrating chatGPT with popular programming languages. Lorenz will demonstrate how chatGPT can be utilized in scripting and programming tasks, providing practical examples and hands-on demonstrations.
 - Writing Emails with chatGPT: Ever thought about automating your emails or improving your written communication with the help of AI? Dive into the ways in which chatGPT can assist in crafting well-structured and articulate emails.
 - Having Fun with chatGPT: Beyond serious applications, chatGPT offers a multitude of fun and creative applications. Lorenz will showcase the lighter side of chatGPT, highlighting how it can be a source of entertainment and novelty.
